## EMPLOYMENT HISTORY

### Jimmy Jib Assistant

Tim Normington Television Ltd, Esher, Surrey

The majority of my time was spent working for the BBC, ITV and SKY in studios, on outside broadcasts and at a variety of different locations. Duties have included Rigging, Tracking, onsite maintenance and repairs. When not on location I have been co-ordinating and maintaining a wide range of Jibs.

### Technical Assistant

ITV Anglia, Anglia House, Norwich

Main duties included assisting crews with a wide range of equipment and repairs including cameras, sound and lighting. I spent time on location doing a range of shows and lots of outside broadcast work for a variety of live events, often as Camera Op. In these scenarios I was given large responsibilities in a pressured environment to ensure the smooth running of the show or event.

### Sound Recordist / Technician

Prime Television, Latimer Road, London

While in charge of the Sound Department and often on location, tasks included operating, preparing, repairing and maintaining a wide range of audio and video equipment in a technical environment. Being the primary sound recordist I was responsible for the quality and maintenance of the audio department. I was often on shoots and was given full responsibility for audio and also as a camera assistant. I utilised my attention to detail for thorough testing and checking of kit to a high standard. While offering great customer service and advice to clients.

---
